Additional Resources to Support State and Tribal Wetland Regulatory Capacity Building

To assist states and tribes develop capacity in their state/tribal program, the Association of State Wetland Managers has compiled a set of useful resources that focus on capacity building around regulatory considerations for each of the US Environmental Protection Agency’s (EPA) Enhancing State and Tribal Programs (ESTP) four core elements.

States That are Willing to Serve as a Resource for Other States or Tribes

ASWM’s Wetland Regulatory Capacity Building Project Workgroup met for more than two years. During these sessions, the following states were identified by the group to have strong wetland regulatory programs. Each of the states below agreed that they were open to serving as resource for other states and tribes. Contact the state regulatory agency for more information. The name of a current contact at that agency is provided, as well as what type of regulatory program the state has in place.
