This slide shows the location of the Pine River site (circled in red). The Pine River is a major river approximately 100-120 feet wide where it flows adjacent to the north end of the property.
Pine River Site

This slide shows how the property was altered between 1982 and 1998 using aerial photos. The 1998 photo shows the extensive road network constructed by Rapanos in preparation for development of a subdivision on the site. The work on the site was completed in the early 1990’s.
Ditches on the Pine River Site

This slide shows two different drainage ditches constructed to drain wetlands on the Pine River Site.
Pine River Site

The photo above shows some of the filling that was done by Rapanos. The photo on the right shows an intact (undisturbed) portion of wetland on the Pine River site.
